2.2. Disclosure of key metrics and overview of risk-weighted exposure amounts5

3. Liquidity Requirements6

3.1. Qualitative information on LCR6

3.2. Quantative information on LCR7

1. Introduction

Agri Europe Cyprus Limited Group (AEC Group or Group) consists of the following members:

- AGRI EUROPE CYPRUS LIMITED, Cyprus (AEC) as a parent company, and
- NORD AGRI N.V., Netherland as subsidiary,
- M&V INVESTMENTS a.d. Beograd, Serbia as subsidiary,
- GORENJSKA BANKA d.d. Kranj, Slovenia as credit institution subsidiary,
- GB Leasing d.o.o. Ljubljana, Slovenia, as a subsidiary,
- AIK BANKA a.d. Beograd, Serbia as credit institution subsidiary,
- AIK Leasing doo Beograd, as a subsidiary,
- EUROBANK DIREKTNA a.d., Beograd as credit institution subsidiary

Disclosure Report of Agri Europe Cyprus Limited Group provides information in accordance with Article 13 of the Regulation No.575/2013 of the European Parliament (Capital Requirements Regulation or CRR).

AEC Group Disclosure Report meets disclosure requirements of Part Eight of CRR and all following amendments (Regulation (EU) 2019/876 (CRR2) of the European Parliament and of the Council of 20 May 2019 amending Regulation (EU) No 575/2013 and other relevant regulations). AEC Group Disclosure Report compiles with requirements set in the Commission Implementing Regulation (EU) 2021/637 laying down implementing technical standards (ITS) with regard to public disclosures by institutions of the information referred to in Part Eight of CRR and all relevant disclosure related guidelines issued by the regulator.

In addition to the main, annual report, being large, listed institution, AEC Group discloses certain information more frequently, in accordance with EBA CRR Article 433a (1).

This is quarterly report, with reference date as of **30th of September, 2024**.

Pursuant to Article 434 (1) CRR, the Group publishes the Reports on the website <https://www.agrieuropa.com.cy/> and <https://www.gbkr.si/>, pursuant to Article 434 (2) of CRR, the Group makes available on its website an archive of Disclosure Reports for previous dates.

All disclosures are prepared on a consolidated basis and are presented in **EUR thousand**, unless otherwise mentioned.

2. Own funds requirements and risk weighted exposure amounts

(CRR regulation, point (d) of Article 438)¹

2.1. Risk weighted exposure amounts and minimum capital requirement

AEC Group calculates risk weighted exposure amount for Pillar 1 risks, i.e., credit risk (including counterparty credit risk), market risks (FX risk and position risk), operational risk and CVA risk in line with regulatory requirements (CRR).

For Credit risk, AEC Group uses Standardized approach. Credit risk weighted assets are the sum of relevant exposure of balance sheet assets and off-balance sheet items (calculated by applying regulatory prescribed credit conversion factors (CCFs) to the different types of off-balance transact), multiplied by the appropriate credit risk weights, as defined in Article 113 of the CRR regulation. Credit risk weight for each individual position of the balance sheet assets and each off-balance sheet items is determined on the basis of exposure class to which the exposure is assign to and the level of its credit quality. The capital requirement for credit risk is calculated by multiplying risk weighted exposure amount by 8%.

¹ Point (h) of Article 438 of CRR regulation refers to RWEA results from the use of IRB approach and internal models under Pillar 1, which are not applicable on AEC Group.

To calculate the capital requirement for Market risks, Group uses Standardized approach, prescribed by CRR regulation.

Capital requirement for Operational risks are calculated by applying Basic indicator approach, as prescribed by CRR.

Capital requirement for Credit Valuation Adjustment (CVA) risk is calculated using Standardized approach, as defined under CRR.

In the template EU OV1, AEC Group represents overview of risk weighted assets and capital requirements calculated in accordance with the Article 92 of the CRR as of disclosure reference date, and also on previous disclosure obligation date. As of 30.9.2024, capital requirements are broken down into different risk categories.

Table 1_EU OV1 Overview of total risk exposure amounts

000 EUR

		Risk weighted exposure amounts (RWEAs)		Total own funds requirements
		a	b	c
		30.9.2024	30.6.2024	30.9.2024

2.2. Disclosure of key metrics and overview of risk-weighted exposure amounts

(CRR regulation, key metrics referred to in Article 447)

In the template EU KM1 the Group shows following items as of 30.9.2024, and as of previous disclosure obligation periods 30.6.2024, 31.3.2024, 31.12.2023 and 30.9.2023:

- own funds structure,
- risk exposure amounts,
- capital buffers,
- important ratios related to capital,
- leverage ratio,
- liquidity coverage ratio and
- net stable funding ratio.

Slight decrease in Capital adequacy ratio in Q3 2024 compared to previous quather is related to growth of the portfolio.

Table 2_EU KM1 Key metrics

20	NSFR ratio (%)	152.3%	148.7%	153.3%	156.7%	158.8%

3. Liquidity Requirements

(CRR regulation, Article 451a(2))

Liquidity risk is organized in a way that responsibilities and roles are divided among different business and organizational units. Overall responsibility for liquidity risk management lies with AEC BoD in its Supervisory and Management Function, in charge for adopting decisions concerning liquidity risk management and provides guidelines, defines structural and income criteria in order to ensure an adequate volume of liquid investments, sets up the basic criteria for the structure of liquidity and funding sources, approves and revises relevant documents from liquidity risk area on Group and solo level. The liquidity management functions are organized in alignment with the three lines of defence. First line of defence are business units, ALM and Treasury, responsible for compliance with risk appetite limits, monitoring market developments, counterbalancing capacity management, future cash flow projections and liquidity contingency plan. Second line of defence are Risk management and Compliance Unit. Internal Audit presents third line of defence in liquidity risk management process. Responsibilities of Internal Audit are to monitor effectiveness of the Group's internal quality control and risk management system, general risk assessment of all aspects and creating of internal audit work plan, including open issues and areas with high risk identified in previous risk assessments/addressing shortcomings.

3.1. Qualitative information on LCR

Liquidity coverage ratio (LCR) was introduced by Basel Committee on Banking Supervision set standards. It entered into the force with the Directive CRD IV and the CRR Regulation, in 2015. LCR is designed to ensure that banks have an adequate level of freely available high-quality liquid assets, which can be converted into cash very quickly and without significant costs, to fulfil its liabilities for the following 30-day period under stringent, stressed situation on financial markets.

LCR as of September 30, 2024, calculated according to Article 451a(2) CRR, was 365.1%, which is significantly higher than regulatory prescribed minimum of 100%. Movements in LCR during 2023 until Q3 2024 were mostly triggered by movements in the level of HQLA and amount of reverse repo transactions with central bank at credit institution subsidiaries on Serbian market.

Since tolerance for liquidity risk is low, it results in the long-term goal of providing a sufficient, stable and diverse funding base and compliance with relevant regulatory frameworks. According to the business model, the most of the funds are in form of non-banking sector deposits. Non-banking sector deposits provide a stable source of funding and limit reliance on the wholesale funding markets. The majority of those deposits are in form of sight deposits that have no remaining maturity. Funding is monitored on monthly basis through „Concentration of funding by counterparty" indicator. It allows the identification of those sources of wholesale and retail funding of such significance that their withdrawal could trigger liquidity problems (share of top 10 largest deponents in total NBS deposits). Concentration of funding by counterparty is part of additional liquidity monitoring metrics under the CRR EBA. This way regulator can obtain a comprehensive view of bank's liquidity risk profile, proportionate to the nature, scale and complexity of its activities.

Liquidity buffer is composed of cash, central bank balance (excluding obligatory reserve) and internally defined unencumbered high quality liquid assets which can be liquidated via repo or sale without significant value loss. Other unencumbered high liquid assets are other unencumbered securities and unencumbered ECB eligible credit claims maturing beyond 1 month. There must be no legal, regulatory or operational impediments to using these assets. On Group level, high quality liquid asset (HQLA) as of September 30, 2024, in amount of 1,309,550 thousand EUR was held in Level 1 cash and central bank reserves and level 1 high quality securities.

There were no such exposures towards derivatives transactions with significant impact on LCR and there weren't any collateral calls on this matter.

On Group level, LCR is calculated for EUR and RSD, recognized as significant currencies, 5% of total group liabilities excluding regulatory capital and off balance sheet liabilities. According to risk appetite statement there is prescribed limit for LCR for all currencies (sum of all currencies). Table presented below

presents the values and figures for each of the four calendar quarters: October-December in 2023, January-March in 2024, April-June in 2024 and July-September 2024. Those values and figures as the simple averages of month-end observations over the twelve months preceding the end of each quarter.

3.2. Quantative information on LCR

Table 3_EU LIQ1 - Quantitative information of LCR

Attest of Disclosure Report 30.9.2024 compliance with Group policies and systems and controls

Senior management i.e., head of Group Risk Function involved in Disclosure Report 30.9.2024 preparation hereby attest that disclosures required by EBA CRR are made in accordance with the Group policies and internal processes, systems, and controls.

Head of Risk Function:
